About Us

At Algonive, we are committed to providing students with real-world experience that equips them for success in the tech industry. Our internship program emphasizes hands-on learning, allowing students to work on live projects and develop practical skills under the guidance of experienced mentors. This immersive approach enables them to effectively apply their knowledge to real-world challenges.

Our team of industry experts is passionate about supporting students in their professional development. At Algonive, we foster a supportive and innovative environment that encourages continuous learning and personal growth, empowering students to confidently step into their future careers.

Web Development

In web development, you gain the skills to create websites and web applications. This involves mastering HTML, CSS, and JavaScript, along with frameworks like React or Angular, and server-side scripting techniques.

TASK - 1

TASK MANAGER

- Create a web-based task management system using JavaScript, allowing users to add, edit, and delete tasks with deadlines.
- Key Features:
  - Users can add tasks with a title, description, and due date.
  - Mark tasks as complete/incomplete and filter tasks accordingly.
  - Use local storage to save tasks persistently.
  - Implement a reminder feature for approaching deadlines.
  - Design a clean and responsive UI with HTML & CSS.

TASK - 2

TASK MANAGEMENT SYSTEM FOR SMALL TEAMS

- Develop a task management web application where small teams or startups can assign, track, and manage their daily work efficiently. This tool can simplify collaborative task tracking and ensure smooth workflow management.
- Key Features:
  - User Authentication: Sign-up/login functionality to ensure secure access.
  - Task Assignment: Users can create tasks and assign them to team members.
  - Task Status Updates: Mark tasks as pending, in progress, or completed.
  - Deadline Reminders: Set due dates for tasks and get notifications.
